Limitations with Existing Models for University Evaluation

Existing Models

- THE World University Rankings (Times Higher Education, UK)
- QS World University Rankings (Quacquarelli Symonds, UK)
- Academic Ranking of World Universities (ARWU, Shanghai Ranking, China)
- US News Best Global Universities Rankings (US News, USA)
- World's Most Innovative Universities (Reuters, UK)

Common Limitations

Academic Tradition vs. Innovative Impacts on the Real World

Challenges by the Companies in the Real World

Big Tech Companies are looking for new ways to hire people without college degrees.

Google recently launched a new selection of courses under its Google Career Certificates program, which only takes about six months to complete.

- There is doubt about the value of traditional higher education.
- Universities need a different approach.

Diversification of Innovative Areas
